The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-19 are rejected under 35 U.S.C. 102(b) as being anticipated by US 4075846 (Li).

Li discloses a thermal engine comprising two drums each comprising a pair of pulleys (, 5, 6, 9, 10), a pair of belts for connecting said pulleys, the first belt is unyieldable which is similar to the idler belt of this application for connecting the first set of pulleys 9, 10, the second belt being yieldable for connecting the second set of pulleys 5, 6, said second belt being made by shape memory alloy Nitinol, many more drums and pulleys 3, 5, 7, 8, are also used in the apparatus. Figure 11 shows the heat exchanger for applying heat to the SMA belts.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Krumme et al, Wayman, and Pachter disclose thermal actuators using pulleys and belts.
